

eclipse dx *overlocker*

When the Eclipse DX was first released, it started a revolution in overlocking history. Baby Lock engineers were determined to overcome the threading nightmares associated with overlockers, and so they invented Jet Air Threading.

Traditional overlockers are renowned for their frustrating threading problems. There are usually 20-30 threading points which need to be threaded in specific order each time a thread breaks or a different colour is required. This process is complicated, troublesome, time consuming and often results in twisted threads and thread breakage. The Jet Air Threading system eliminates these problems. Simply push the lever and the loopers are instantly threaded.

There is so much more to the Eclipse DX. With a total of 10 patented features exclusive to Baby Lock, the Eclipse DX makes overlocking friendly and effortless.

INSTANT JET AIR THREADING:

Simply push the lever and air blows the thread through the tubular loopers! Threading loopers made easy by Baby Lock.

DIFFERENTIAL FEED:

A full range differential feed used for gathering and easing as well as compensating for stretch distortion of knit fabrics.

TUBULAR LOOPERS:

Allow the Eclipse DX to be threaded in any order. Threads no longer tangle as they are not exposed. No more thread guides, no more threading problems.

NEEDLE THREADER:

Thread the eye of the needle quickly and easily - a touch of a lever is all that is required.

ECLIPSE DX FEATURES:

- Jet Air Threading - Both loopers thread in a breeze
- Micro Matic Twin Cam Tension system
Twin cam design eliminates twists and forces threads into the tension discs, thus pretensioning and aligning threads to pass through the main tension cam.
- Overlock with 2, 3, or 4 threads
- Flatlock stitching with 2 or 3 threads
- Rolled hemming with 2 or 3 threads
- Built in needle threader
- Lock down blade system - can be used as a fabric guide when engaged
- Tubular loopers prevent thread tangling
- Vertical needle system - minimizing needle deflection
- Heavy duty cutting system cuts thick fabrics with ease
- Rolled hem adjustment with just a turn of a dial
- Full range differential feed – ranging from 0.6 to 2
- Adjustable stitch width - ranging from 1.5mm to 7.5mm
- Adjustable stitch length 0.75mm - 4mm
- Snap-on multi purpose foot including ribbon and tape guide
- Optional range of accessory feet available for beading, piping, elastic, cording, gathering, etc. - 9 in total
- Built in thread cutter and accessory storage
- 1500 stitches per minute
- Needle system HAX1SP #11/75 #14/90
- 5 year conditional warranty, parts and labour
- Machine weight 7.3kg
- Made in Japan

OPTIONAL ACCESSORIES:

- Flat sole foot
- Elasticating foot
- Piping foot 3mm
- Lace foot
- Piping foot 5mm
- Blind hem foot
- Gathering foot
- Beading foot
- Clear foot
